Dear Sir/Madam,

I am writing to apply for the Front-End Development Intern position advertised on www.job.com on January 1, 2023. I am currently pursuing a Bachelor's degree in Computer Science at CADT, where I have built a strong foundation in front-end development through hands-on projects and teamwork.

I am highly motivated to apply my skills in a real-world environment and contribute meaningfully to your team. I have experience working with React.js to build responsive user interfaces, and I am familiar with collaborating in team environments using Git and GitLab.

My relevant experience includes:

- Frontend Developer: Developed responsive features for an admin dashboard and homepage using React.js.
- Frontend Developer & UI/UX (Capstone Projects): Designed and developed complete system prototypes and responsive web interfaces in collaboration with teammates and stakeholders.
- Technical Projects & Volunteering: Built a full-stack e-commerce website and an academic report system, completed an internship as a graphic designer, and participated in school and community initiatives, strengthening my teamwork and leadership skills.

I am eager to learn, hardworking, and passionate about building user-centered web applications. I believe this internship will help me grow both technically and professionally, while allowing me to contribute value to your organization.

Thank you very much for considering my application. I look forward to the opportunity to further discuss how I can contribute to your team.

Yours sincerely,

Choun Rathanak
